## Welcome to ATLinks...

ATLinks is a complete dispatch, Point of Contact, and Accounts Receivable program designed exclusively for the Auto Transport Industry. ATLinks is designed to track your company's information from the time the order is placed until the customer has been billed. ATLinks was designed by auto transporters for auto transporters and great effort has been placed on making the program fast and user friendly. Even those with little or no computer experience will be comfortable using this program in a short amount of time.

## System Requirements...

Windows 9x, NT, ME, 2000, or XP,  
5 MB Hard Drive Space  
CD-ROM Drive for Installation (3.5" Floppy available)  
1024 x 768 Video Resolution  
17" or Larger Monitor (recommended but not required)  
Mouse or Other Pointing Device  
Windows Compatible Printer

## Installation...

To install ATLinks from a CD:  
Insert the CD into the CD-ROM drive. If the install program does not start automatically, *Click* on the Windows START button and select RUN. Type in the letter that represents your CD-ROM drive followed by **:atlsetup.exe** If your CD-ROM letter is D, then type **d:\atlsetup.exe** OR you can *click* on the BROWSE button to locate the atlsetup.exe file. After the initial installation, any upgrade that you receive will be named **ATLUpdate.exe** follow the above instructions substituting ATLUpdate.exe for ATLSetup.exe

## Starting the ATLinks program...

The first window that you see when you start the ATLinks program is the “System Sign On”.

This is where you will type in your USER ID and PASSWORD. Remember to spell them correctly. If you have not received, or have forgotten your User Id or Password contact the person in charge.

If this is a new installation or an evaluation copy of ATLinks.

USERID = “ATLINKS”

PASSWORD = “DEMO”

Click on the OK button to continue or the CANCEL button to quit.

## Main Menu...

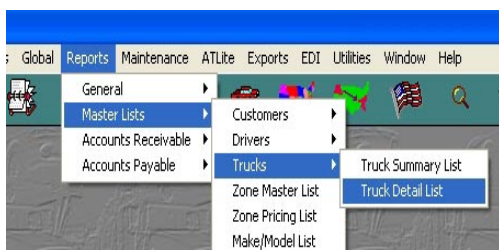

After the sign on window has been completed, the Main Menu will appear. At the top of this window you will notice several buttons below a group of words in the light gray strip (refer to the illustration).

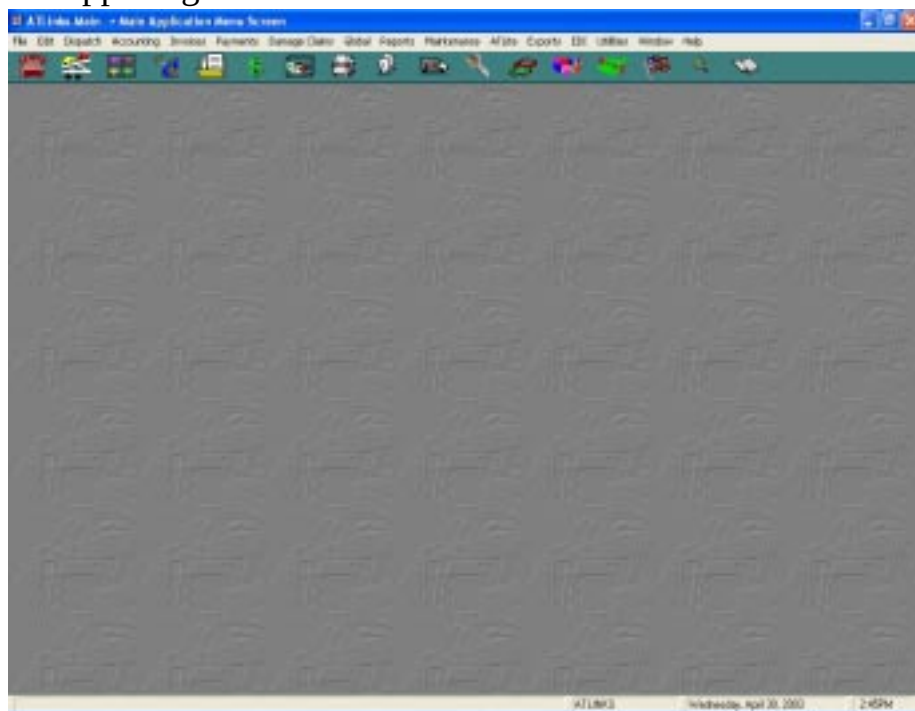

These words are menu choices that are activated when you click on them with the mouse pointer. When a menu choice is clicked on, it will open a list with additional choices in a related area. For instance, if you click on the word Report,

you will see a list of reports to choose from. If there is an arrow to the right of a choice, it means that another list will open when the selection is highlighted. If the manual says select GLOBAL from the Main Menu, it means click on the word GLOBAL at the top of the Main Menu window. If it says select REPORTS >TRUCKS >TRUCK DETAIL LIST from the Main Menu window, it means click on the word REPORTS, then highlight the option that reads TRUCKS and then click on TRUCKS DETAIL LIST

The Main Menu window remains open the entire time the ATLinks program is running. If you close the

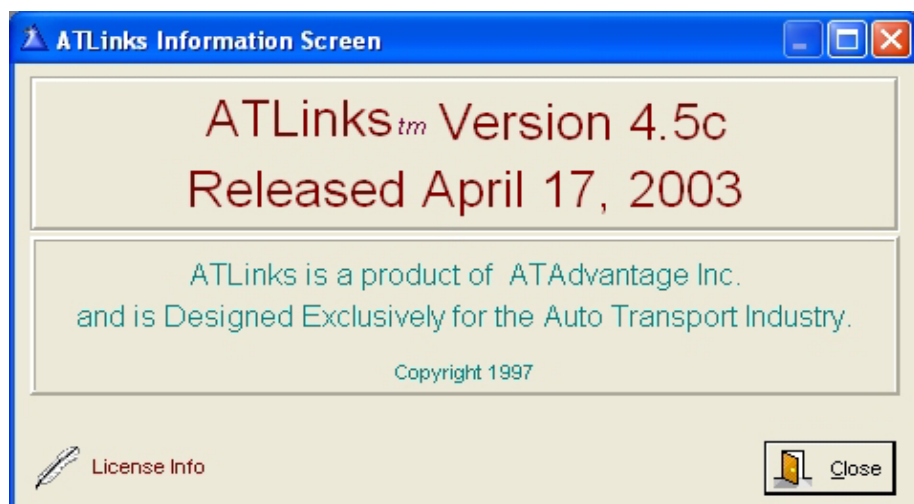

Main Menu, the ATLinks program will also shut down. To close the Main Menu window and shut down the ATLinks program you can select FILE > EXIT or click on the X in the upper right hand corner of the window

## Are you registered?

ATLinks installs on your computer as a two user, fully functional 30 day evaluation. After the evaluation expires the user is still able to see any information that has been entered into the system but is unable to enter new data. The company information at the top of the printed reports is listed as ATLinks Demo Software and all address information and phone numbers refer to our offices here at ATAdvantage, Inc. The second is a list of program unlock codes and a key sequence that needs to be entered into ATLinks. This information tells ATLinks how many users are allowed and extends or eliminates any program expiration date. From the Main Menu click on HELP > ABOUT this opens the ATLinks Information Screen. This information screen will display the version and release date of the program installed on your machine.

Clicking on this button will open a window that displays your company's name, the expiration date, the maximum amount of concurrent users, and finally the key or unlock code that will validate use of the system. You can obtain this key by contacting your ATLinks representative.

A screenshot of a Windows-style dialog box titled "This Product is Licensed to:". The dialog has a blue title bar with standard window controls. The main area is light beige and contains four labels with corresponding input fields: "Company Name:" with a text box containing "ATLinks Demo Software", "Expiration Date:" with a date box containing "5/30/2003", "Max Users:" with a spin box containing "2", and "Key:" with an empty text box. At the bottom right, there are two buttons: "Register" with a notepad icon and "Close" with a door icon.

Clicking on the register button will update the information and check to make sure a valid Key number has been entered. If the key is invalid the user will get an error screen, otherwise you are returned to the about window and can click on the Close button to return to the main menu.

## Company Setup Information...

Click UTILITIES>COMPANY INFORMATION on the main menu to open the Company Update Window. The GENERAL tab is currently selected. The cursor is now blinking in the field titled “Address 1:”. This is where you will enter your company’s information.

### Allow Duplicate VIN Entry?

This is where you will tell ATLinks whether or not you would like the program to allow an existing VIN to be re-entered into the program. You have the option of telling ATLinks to Always allow duplicate entries, never allow them, or to prompt you before the program allows one to be entered into an order.

Next are the warning fields for program expiration, and driver Qualification expiration. Enter in the number of days you would like to be warned prior to these events taking place. If these fields are left blank, the program will ignore these expirations.

Click on the REPORT SETUP tab. From here you can alter the look and feel of several key reports.

ATI Inks, COOF -> Company Update Window

General | Report Setup | Accounting

General Report Configuration

Logo File:   ☐ Grey Shading

Invoice Logo Position (in 1/1000 inches)

In From Left Side:  Down From Top:  Height:  Width:

Tripsheets

Comment Header:

Comments:

Invoice Footer Comments:

PLEASE REFERENCE INVOICE NUMBER ON YOUR CHECK  
ICC & PUC REGULATIONS BOTH REQUIRE TRANSPORT INVOICES TO BE PAID WITHIN SEVEN (7) DAYS

Fax Server Base Path:

OK Cancel

The following is an explanation of the various fields in this window.

#### *Customer logo:*

*Tells the program the logo you would like used on your reports. Click on the folder button to browse for the logo you would like.*

#### *Grey shading check box:*

*This alternates the color of the detail lines of in the invoice and trip sheet reports.*

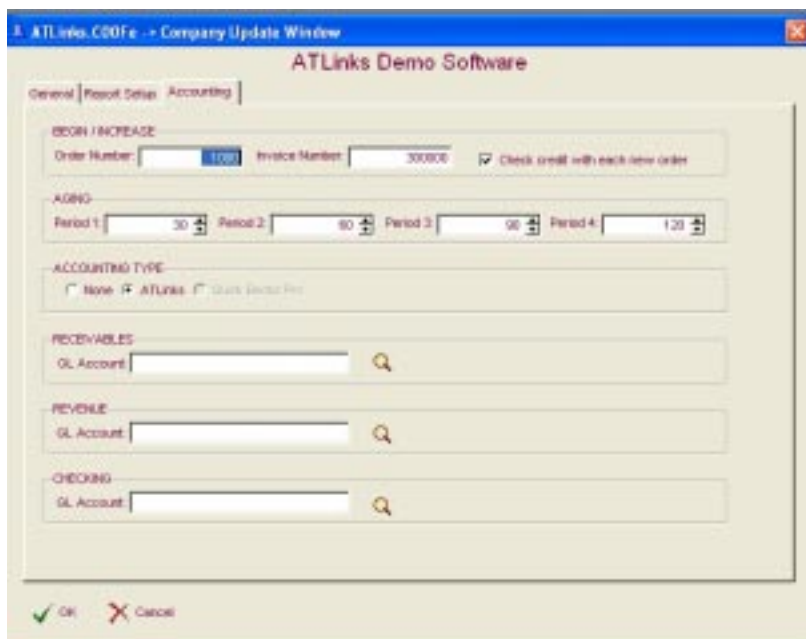

#### *Invoice Logo position:*

*These fields will tell ATLinks how to position and size your logo on the customer invoice. Positions and sizes are measured in 1/1000 inches. Placing the value 500 in one of these fields would tell ATLinks that you want 1/2 of an inch for that position/size respectively.*

### *Trip sheet /Invoice Section:*

*This section is where you may put a comment onto the header or footer of the trip sheet print out. There is also a footer comment section for the invoice printout here.*

Next click on the ACCOUNTING tab.

The screenshot shows the 'ATLinks Demo Software' window with the 'Accounting' tab selected. The window title bar reads 'ATLinks.CEOFe -> Company Update Window'. The 'Accounting' tab is active, showing fields for 'BEGN / INCREASE', 'AGING', 'ACCOUNTING TYPE', 'RECEIVABLES', 'REVENUE', and 'CHECKING'. The 'BEGN / INCREASE' section has 'Order Number' set to 11991 and 'Invoice Number' set to 300806, with a checked box for 'Check credit with each new order'. The 'AGING' section shows four periods: Period 1 (30), Period 2 (90), Period 3 (90), and Period 4 (120). The 'ACCOUNTING TYPE' section has radio buttons for 'None', 'ATLinks' (selected), and 'Quick Select Prio'. The 'RECEIVABLES', 'REVENUE', and 'CHECKING' sections each have a 'GL Account' field with a magnifying glass icon.

This window allows you to enter the following setup information for your company.

### *Order Number:*

*Enter the beginning number for your companies Orders. If at any time this number is changed to a number greater than the highest order number in the system, the next order created will begin with the new beginning order number and additional orders will increment by 1.*

### *Invoice Number:*

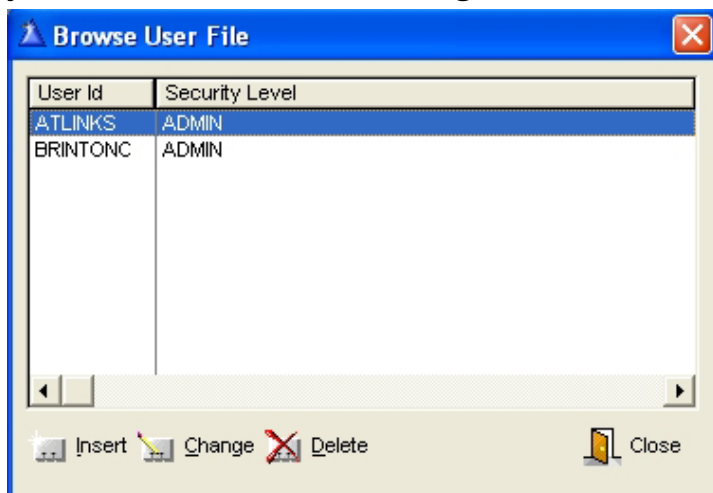

*Enter the beginning number for your companies Invoices. If at any time this number is changed to a number greater than the highest Invoice number in the system, the next invoice created will begin with the new beginning invoice number and additional invoices will increment by 1.*

### *Aging Periods 1 - 4:*

*Enter the aging periods in days to calculate on the aging report. (i.e. 30, 60, 90, 120)*

## **User Setup Information...**

Click UTILITIES>USER INFORMATION on the main menu to open the Browse User File window. This is where you can create users for the sign on screen.

Click the insert button to add a User, or click the change button to edit an existing user name or password. The Security level will determine whether or not someone has the ability to add or change users. ADMIN means the user has administrative rights to edit users and add them. Both levels give access to all other areas of the ATLinks program.

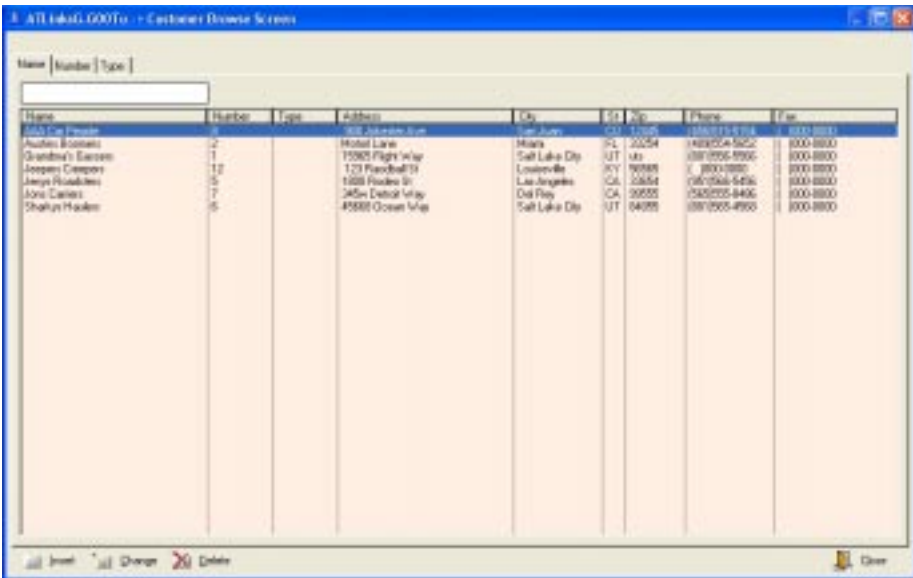

# Setting up your company's Master Files...

There is information specific to your company that must be entered into the ATLinks program. This information is referred to as the Master Files. The information in these files is used for general lookup purposes and field default values. The following section defines this information and explains how to Add, Change and Delete records that are stored in these Master data files.

## Customer Master File...

From the Main Menu window *click* on the button with the rolodex or select GLOBAL > CUSTOMER MASTER FILE. This will open a *Browse Box* containing a list of all the customers that have been entered into ATLinks. You should see a name, address, and phone number for each. If the list is empty it means that no customers have been entered. The following illustration shows the Customer *Browse Box* and explains how to use it.

ATLinksG.G00Tu -> Customer Browse Screen

Name | Number | Type |

| Name              | Number | Type | Address           |
|-------------------|--------|------|-------------------|
| AAA Car People    | 8      |      | 900 Jokerster Ave |
| Austins Boomers   | 2      |      | Motorl Lane       |
| Grandma's Gassers | 1      |      | 15965 Flight Way  |

You may choose to view your customers in order of Name, Customer Number, or Type

**Insert** Click on the INSERT *button* to add a NEW customer. This will open a blank Customer Update Form. The Customer update form is defined on the following page under Customer Maintenance.

**Change** Click on the CHANGE *button* to EDIT an existing customer. This will open the Customer Update Form with all the highlighted customers information. You can either view the information or make Changes at this time.

**Delete** Click on the DELETE *button* to REMOVE an existing customer. A message will appear asking you to confirm your decision to delete the customer. Click YES to remove the customer or NO to keep the customer information.

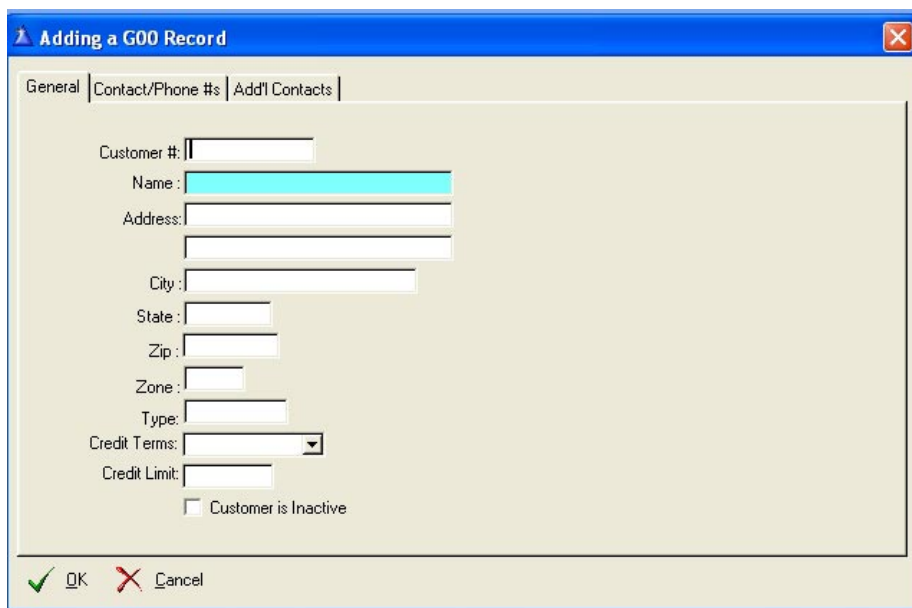

**Close** Click on the CLOSE *button* to exit the Customer Browse Box

## Customer Maintenance...

The following illustration shows the Customer Update window. Notice the *tabs* at the top of the window. The tabs are shown on the next page along with a description of the information each field on the window should contain.

Fields that appear with a Light Blue colored background are REQUIRED. If any of these fields are left empty when you try to save a new customer, or make changes to an existing customer, the update screen will remain open and the cursor will blink in the unsatisfied field.

### General...

The screenshot shows a window titled "Adding a G00 Record" with a blue title bar and a close button. The window has three tabs: "General", "Contact/Phone #s", and "Add'l Contacts". The "General" tab is selected. The form contains the following fields and controls:

- Customer #:
- Name:  (highlighted in light blue)
- Address:
- 
- City:
- State:
- Zip:
- Zone:
- Type:
- Credit Terms:
- Credit Limit:
- ☐ Customer is Inactive

At the bottom, there are two buttons: "OK" (with a green checkmark icon) and "Cancel" (with a red X icon).

*Name: Company Name*  
*Address1: 1st line of address*  
*2: 2nd line of address*  
*City: City name*  
*State: 2 letter state code*  
*Zip: Zip Code*  
*Zone: Pricing zone*

*"Customer is C.O.D."*

*If customer is COD, this box can be checked so a COD warning prints on the order.*

*Check "Customer is Inactive" to disable customer from being selected as pickup, drop off, or bill to customer on an order...*

**Contact/Phone#s...**

The screenshot shows a window titled "Adding a GDD Record" with a tabbed interface. The "Contact/Phone#s" tab is selected. It contains several input fields: "Contact:" (a text box), "Phone:" (a numeric box with "000-0000"), "Mobile:" (a numeric box with "000-0000"), "Pager:" (a numeric box with "000-0000"), "Fax:" (a numeric box with "000-0000"), and "Data:" (a numeric box with "000-0000"). At the bottom, there are "OK" and "Cancel" buttons with checkmark and X icons respectively.

*Contact: Name of your contact*

*Phone: Phone number*

*Mobile: Mobile phone*

*Pager: Pager*

*Fax: Fax Number*

*Data: Electronic data port*

**Additional Contacts...**

The screenshot shows the same "Adding a GDD Record" window, but with the "Add Contacts" tab selected. It displays a table with four columns: "Contact", "Description", "Type", and "Phone Number". The table is currently empty. Below the table are buttons for "Add", "Insert", "Group", and "Delete". At the bottom, there are "OK" and "Cancel" buttons with checkmark and X icons respectively.

| Contact | Description | Type | Phone Number |
|---------|-------------|------|--------------|
|---------|-------------|------|--------------|

Click the insert button to add additional contacts

*Contact: Name of your add'l contacts*

*Description: Description of the contact*

*Type: Type here how you would like to remember your contact*

*Phone: Your additional contacts phone number*

Click on the OK button to add the new Customer or save changes made to an existing customer

Click on the Cancel button to abort adding or changing the customer record.

## Browsing Drivers...

Press the button with the picture of the faces or Select GLOBAL > DRIVER MASTER FILE from the Main Menu to open the Driver Browse window. This *Browse Box* contains a list of all the drivers that have been entered into ATLinks. You should see a name and a phone number for each. If the list is empty it means that no drivers have been entered. The Driver Browse window is used in the same manner as the Customer Browse window (see Browsing Customers on page 14 for details).

## Driver Maintenance...

The following illustration shows the Driver Update window.

ATLink.G181e - Driver Update Screen

General | Qualifications

Name:

Address:

City/State/Zip:

Phone:

Rate:  Damage Reserve:

✓ OK ✗ Cancel

Name: *Driver's Full Name*  
 Address 1: *Address 1st Line*  
 2: *Address 2nd Line*  
 City: *City Name*  
 State: *2 Letter State Code*  
 Zip: *Zipcode*  
 Phone: *Phone Number*  
 Rate: *Percentage Driver is Paid*  
 Reserve: *Percentage withheld for damage*

Click on the Qualifications Tab. This will bring you to a screen filled with check boxes concerning your drivers qualifications. Some fields will offer an expiration date. You have the option of telling ATLinks to notify you prior to these expirations, based on the amount of time you specify. If the expiration dates are left blank. The fields will be ignored.

The screenshot shows a software window titled "ATLinksG.G10Fe -> Driver Update Screen". It has two tabs: "General" and "Qualifications", with "Qualifications" being the active tab. The main content area is titled "Driver Qualification Checklist" and contains a list of items, each with a checkbox and a reference code. Some items also have an "Expiration Date" field. Below this is a "Confidential Checklist" with another list of items and checkboxes. At the bottom left, there are two buttons: a green checkmark icon labeled "OK" and a red X icon labeled "Cancel".

| Driver Qualification Checklist                                             |                                      |

☒ OK    ☐ Cancel

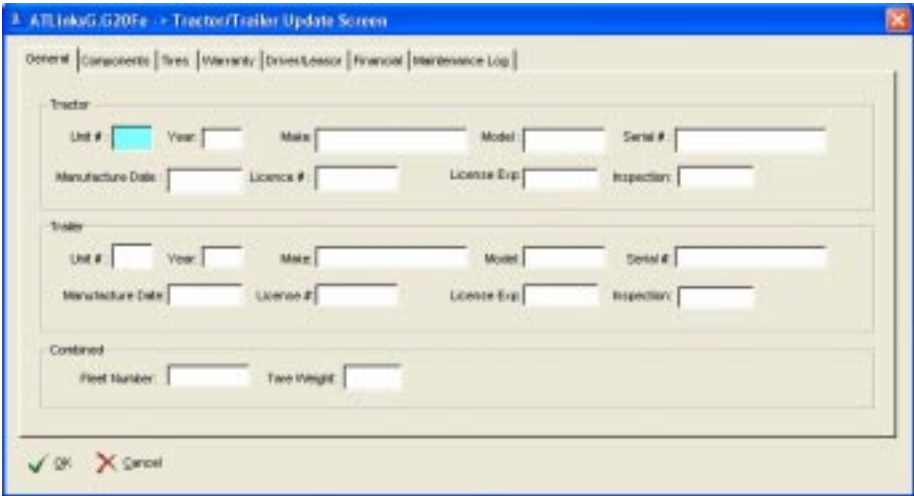

# Browsing Trucks...

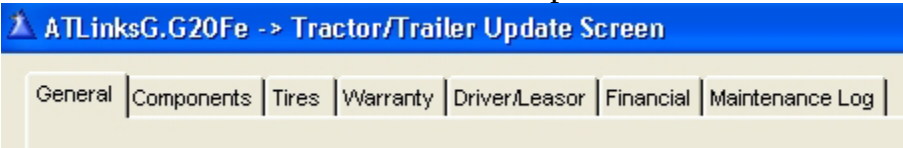

Selecting GLOBAL > TRUCKS MASTER FILE from the Main Menu or clicking on the button with the picture of a truck will open the Truck Browse window. This *Browse Box* contains a list of all the trucks that have been entered into ATLinks. You should see a Number, Manufacturer, Model, and Tare weight for each truck, and its trailer. If the list is empty it means that no trucks have been entered. The Truck Browse window is used in the same manner as the Customer Browse window.  
(See Browsing Customers for details).

## Truck/Trailer Update...

The following illustration show the Tractor/Trailer Update window.

This update screen will allow you to keep track of important information concerning your trucks and trailers. Following is a list of the fields in each screen an explanation for each field.

## The General tab...

## TRACTOR

|                     |                                          |
|---------------------|------------------------------------------|
| Unit #:             | Unique ID number                         |
| Year:               | 4 digit year                             |
| Make:               | Manufacturer of Truck                    |
| Model:              | Model                                    |
| Serial#:            | VIN                                      |
| Manufacturer Date:  | Date truck was manufactured              |
| License#:           | Plate Number                             |
| License Expiration: | Expiration date of the license plate     |
| Inspection:         | Expiration date of the safety inspection |

## TRAILER:

|                     |                                          |
|---------------------|------------------------------------------|
| Unit #:             | Unique ID number                         |
| Year:               | 4 digit year                             |
| Make:               | Manufacturer of Truck                    |

*Contract End Date:*      *Date Contract Ends*

## The Maintenance Log Tab...

The maintenance Log tracks general maintenance that is performed on a unit.

Click the insert button to enter in a new maintenance record. This will bring up the Maintenance Log Update Screen. Here you will enter in a description of the maintenance, the date, and the mileage.

The picture of a magnifying glass will allow you to select a pre-entered description from the Browse Maintenance Master File.

A screenshot of a software window titled 'ATLM.M00FeNoTrk -> Maintenance Log Update Screen'. It contains four input fields: 'Truck #' (a small text box), 'Description:' (a larger text box with a magnifying glass icon to its right), 'Date:' (a text box containing '5/15/2003'), and 'Mileage:' (a text box). At the bottom, there are 'OK' and 'Cancel' buttons.

You may also get to the maintenance log screen by clicking the picture of a wrench on the main menu bar. Or by clicking Maintenance>Maintenance Log.

OK = Add or Save

Cancel = Abort

## What is a Zone?...

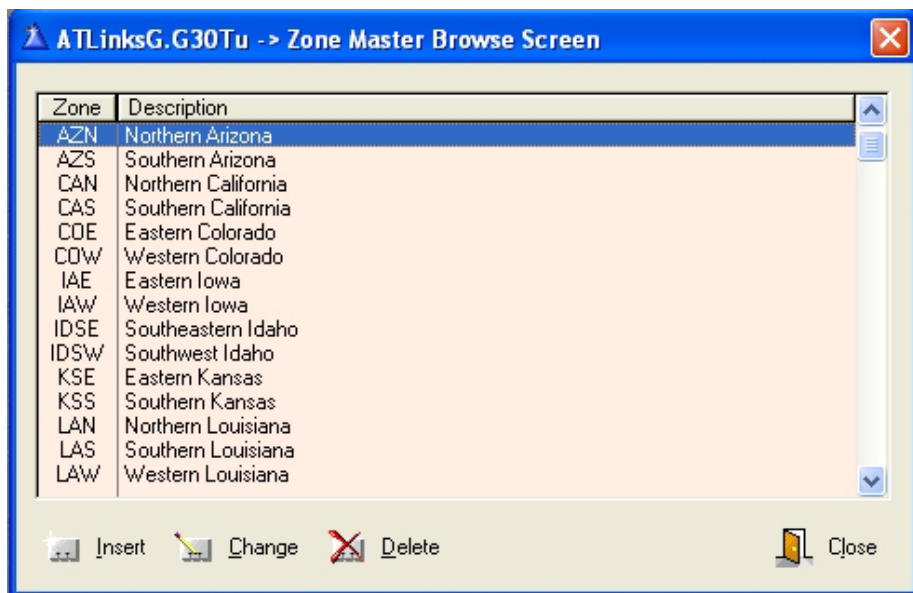

A zone is a specified location within your area of business that can be used for automatically setting transport costs. For example a transporter in California may break the state into three pricing zones, Norther, Southern, and Central California. He may represent these zones with the letters CAN, CAS, and CAC respectively. Prices can now be assigned from one zone to another, for example CAN (northern California) to CAC (central California) could be assigned a transport price of \$325.00. If the ATLinks program is aware of this then every time we create an order that picks up from a customer with a Northern California zone, and drops at a customer with a Central California zone, The price per vehicle will automatically default (Be assigned) to an amount of \$325.00. If on occasion this amount should need to be changed, simply overwrite it with the correct amount.

## Browsing the Zones...

Clicking the button displayed or Selecting GLOBAL > ZONE MASTER FILE from the Main Menu will open the Zone Master browse window.

Zones can be defined in any way that makes sense to your business. Some define portions of states while others may go by city or even zip codes. There is no correct way to define zones. Even a combination of large and small areas could work.

The Zone Master Browse Box is a little bit different from the Browse Boxes that we've discussed so far. The Insert and Change buttons still allow you to ADD or EDIT the zone, but there is no update form window like the one we entered our customer information into. Instead the information is added or changed directly on the Browse Box (sort of like entering information into a spreadsheet). This feature is referred to as EDIT IN PLACE, and is found in different places throughout the ATLinks program.

*Zone:* Up to 5 letters to abbreviate the zone location  
*Description:* A general description of the zone location

Clicking the Insert Button opens a new line where the blue highlighter bar is. Type information directly into the browse box. Press the TAB key to move to the next field and press the ENTER key when your finished to save the record. If you want to cancel the Insert, press the ESC key.

Clicking the Change Button opens the existing line where the blue highlighter bar is. Type information directly into the browse box. Press the TAB key to move to the next field and press the ENTER key when your finished to save the record. If you want to cancel the Change, press the ESC key.

Click on the Delete button to remove the highlighted record.

Click on the close button to exit the window.

## Zone Pricing...

The Zone Default Amount Browse window also uses the EDIT IN PLACE functionality described in Browsing the Zones on the previous page. Zone default pricing is not a required feature of ATLinks but will save the dispatcher time and reduce the chance of incorrect pricing.

Pressing button displayed above or Selecting GLOBAL > ZONE TO ZONE FILE form the Main Menu will open the Zone Default Amount Browse window.

ATLinksG.G32Tu -> Zone Default Amount Browse Screen

| Zone A | Zone B | Amount | Description                                 |
|--------|--------|--------|---------------------------------------------|
| CAN    | AZN    | 275.00 | Northern California To Northern Arizona     |
| CAN    | FLS    | 500.00 | Northern California To Southern Florida     |
| CAN    | MTN    | 215.00 | Northern California To Northern Montana     |
| CAS    | IDS    | 220.00 | Southern California To Southern Idaho       |
| CAS    | WYW    | 205.00 | Southern California To Western Wyoming      |
| COW    | FLN    | 350.00 | Western Colorado To Northern Florida        |
| COW    | IDN    | 210.00 | Western Colorado To Northern Idaho          |
| FLN    | CAS    | 525.00 | Northern Florida To Southern California     |
| FLS    | NMNE   | 400.00 | Southern Florida To Northeastern New Mexico |
| IDN    | UTN    | 150.00 | Northern Idaho To Northern Utah             |
| IDN    | WAE    | 130.00 | Northern Idaho To Eastern Washington        |
| IDS    | MTS    | 180.00 | Southern Idaho To Southern Montana          |
| IDS    | UTN    | 125.00 | Southern Idaho To Northern Utah             |
| MTN    | MTS    | 95.00  | Northern Montana To Southern Montana        |

Insert Change Delete Close

*Zone A: The abbreviation of the origination zone*

*Zone B: The abbreviation of the destination zone*

*Amount: The amount to transport 1 vehicle from zone A to zone B*

*Description: A description of the zone pricing*

The default pricing from zone 1 to zone 2 does not have to be the same as the pricing from zone 2 to zone 1. Many times companies charge more for a car hauled in one direction than the other. ATLinks offers complete freedom in this pricing scenario.

## Make/Model cross references...

Your ATLinks program is shipped with a Make/Model cross reference file. This makes it fast and easy to enter in the models of the cars on the order. You do not have to type in the make because the program already knows what it is. Even though there are hundreds of models already in the program, new models are produced every year. This window allows you to keep this file updated with the latest information as you need it. The Make/Model Browse window is also EDIT IN PLACE and has the same functionality found in Browsing the Zones on the previous page. Selecting GLOBAL > MAKE/MODEL FILE from the Main Menu will open the Make/Model Browse window.

ATLinksG.G42Tu -> Make/Model Browse Screen

| Model              | Make     | Weight |
|--------------------|----------|--------|
| Explorer SportTrac | Ford     | 4,322  |
| 100                | Audi     | 3,200  |
| 100cs              | Audi     | 3,200  |
| 100s               | Audi     | 3,200  |
| 190E               | Mercedes | 2,953  |
| 2.2CL              | Acura    | 3,050  |
| 2.3CL              | Acura    | 3,050  |
| 2.5TL              | Acura    | 3,285  |
| 200SER             | Nissan   | 3,000  |
| 200SX              | Nissan   | 2,800  |
| 240DL Wagon        | Volvo    | 3,300  |

*Model: Model of the Vehicle*

*Make: Vehicle Manufacturer*

*Weight: Weight of Vehicle*

Double clicking on the highlighted record in most browse boxes is the same as clicking on the CHANGE button.

A RIGHT mouse click anywhere on most browse boxes will pop up a menu with selections for Insert, Change, and Delete. Clicking on the menu selections is the same as clicking on the associated buttons.

Clicking the Insert Button opens a new line at the blue highlighter bar. Type information directly into the browse box. Press the TAB key to move to the next field and press the ENTER key when your finished to save the record. If you want to cancel the Insert, press the ESC key.

Clicking the Change Button opens a the existing line where the blue highlighter bar is. Type information directly into the browse box. Press the TAB key to move to the next field and press the ENTER key when your finished to save the record. If you want to cancel the Change, press the ESC key.

Click on the Delete button to remove the highlighted record.

Click on the close button to exit the window.

## Customer Orders...

Now that we have finished setting up the company's Master Files we are ready to start entering customer orders. The first step in doing this is to press the picture of the telephone or select DISPATCH > ORDER ENTRY BROWSE SCREEN from the Main Menu. Either choice you make will open the Orders Entry Browse Screen. The following illustrations will describe the Orders Entry Browse Screen in detail.

| Order # | Customer # | Bill To          | Units | Order Date | Orig Zone | Dest Zone | Dest City    | Dest State | Total Amount |
|---------|------------|------------------|-------|------------|-----------|-----------|--------------|------------|--------------|
| 1001    | 1001       | Audible Business | 5     | 4/25/2001  | 11        | 12        | New York, NY | NY         | 22,276.00    |

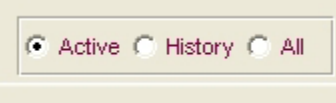

### What do these Tabs do?...

The Tabs at the top of the window allow you to sort the active order list in any of 4 ways.

Order Customer, Billing Customer, Load Zone or Drop Zone

| Order # | Customer # | Bill To          | Units | Order Date | Orig Zone | Dest Zone | Dest City    | Dest State | Total Amount |
|---------|------------|------------------|-------|------------|-----------|-----------|--------------|------------|--------------|
| 1001    | 1001       | Audible Business | 5     | 4/25/2001  | 11        | 12        | New York, NY | NY         | 22,276.00    |

## And the Check Boxes?...

If an order has not been delivered it is still active. Select the Active option to see all those orders that are still active. When an order has been delivered and confirmed it goes into the history. Click this option to see orders in the history. Or select “all” to see both Active Items and Items in the History.

Each order contains from one to many vehicles. Each of these vehicles is assigned a status that matches one of the above check boxes. If you check the WAITING box, the list of active orders will be reduced to only those orders that contain at least one vehicle that has a status of waiting. If more than one box is checked, the list will be increased to orders that contain at least one vehicle with any status matching the checked boxes at the top.

## That leaves the Buttons...

Type in the complete VIN contained in the ATLinks program to the left of this button and then click on the button to FIND the vehicle.

PRINT a copy of the order (see Appendix A, Figure 1 to view order report)

Add a NEW order

EDIT the highlighted order

DELETE the highlighted order

EXIT the active orders browse window

## Creating a NEW Order...

Click the INSERT button on the Orders Entry Browse window. This will open the Orders Update Screen. Notice the tabs at the top of the window, the Pickup/DropOff tab is currently selected. Today's date will be displayed in the pickup and drop off sections and all the other fields will be empty. The cursor is now blinking in the field titled "Pickup".

ATLinks 2007e - Orders Update Screen

Order Number: 1001 Date: 5/5/2007 Active

Navigation: Pickup/DropOff | Delivery Information | Special Instructions | List of Cars

**PICKUP** Vehicle: [Customer Name] [Search] [New] [Edit] [Delete] Zone: FL2 [Apply]

Address: [Address Line 1]  
City: Miami State: FL Zip: 33134  
Contact: [Name] Phone: (407) 555-1234 Mobile: XXX-XXXX

**DROPOFF** Vehicle: [Green Transporters] [Search] [New] [Edit] [Delete] Zone: CA5 [Apply]

Address: [Address Line 1]  
City: San Diego State: CA Zip: 92161  
Contact: [Name] Phone: XXX-XXXX Mobile: XXX-XXXX

OK Cancel align detailed entry

Start typing the name of the customer where the vehicle is to be picked up. When you type in a letter the ATLinks program copies the closest match from the Customer Master File. The more you type the closer the match until you have the correct customer. If there is not a match in the Customer Master File, ATLinks allows you to enter the customer information anyway. If you want to ADD this customer to the Master file, click on the APPLY  Apply button next to the pickup section (the apply button is only available if the customer is not in the Master file). A window will appear asking if you would like to ADD the customer to the Master File. Press YES to ADD the customer or NO to abort. The customers on the order DO NOT have to be in the Master File.

ATLinks Message Screen

? This record does not exist...  
Would you like to ADD it to your permanent record?

Yes No

After the pickup customer has been typed in, press the ENTER key. This will move the cursor directly to the DropOff customer field. Repeat the previous step for the DropOff customer. After the DropOff customer is typed in, press the ENTER key. The Billing Information tab will now be selected and the cursor is blinking in the Bill To field.

You can enter the Bill To customer for this order the same way you entered the pickup and drop off customers in the previous step. Most of the orders however will bill to the customer where the vehicle is picked up or the customer where the vehicle is to be dropped off.

Click on the Same As Pick Up button to COPY all information from the pickup customer into the bill to section

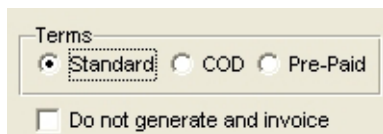

Click on the Same As DropOff button to COPY all information from the drop off customer into the bill to section

After you type in the bill to customer and press the ENTER key or click on one of the buttons to copy the information over your cursor will be in the number of units field. Type in the number of vehicles to be transported for this order.

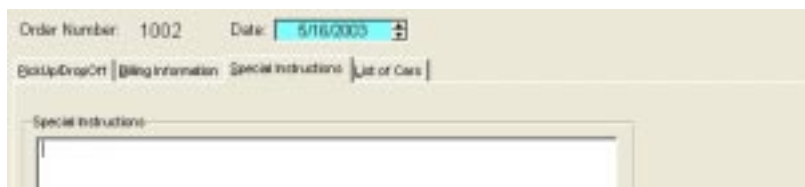

All vehicles on the order **MUST** have the same pickup and drop off locations. If the same customer has vehicles in a different pickup location or to be delivered to a different drop off location, you will need to create a separate order. After typing in the number of vehicles, Press the TAB key to move the cursor to the Amount Per Unit. If you are using the zone default pricing the amount per unit field will already contain an amount and a description will display underneath. If the default price is incorrect or needs to be over written you may change it.

You may choose to define the billing terms of this order by

A screenshot of a software interface for selecting billing terms. It features a section titled "Terms" with three radio button options: "Standard" (which is selected), "COD", and "Pre-Paid". Below these options is a checkbox labeled "Do not generate and invoice".

clicking on one of the following buttons. These fields are for your information. The COD button will put COD on the trip sheet, for your driver's use. COD is the only option that will have an effect anywhere else in the program.

Click on the Special Instructions Tab to type in any instructions or comments associated with this order.

A screenshot of a software interface showing the "Special Instructions" tab. At the top, it displays "Order Number: 1002" and "Date: 5/16/2003". Below this are four tabs: "PickUp/DropOff", "Billing Information", "Special Instructions" (which is active), and "List of Cars". The "Special Instructions" tab contains a large, empty text area for entering instructions.

Click on the List of Cars Tab. This tab contains a browse box with the number of vehicles you entered in the Number of Units field. Each vehicle has a unique Unit ID, an Amount (the Amount per Unit), and a Status of WAITING. This is an EDIT IN PLACE browse box. Click on the Change button to update the highlighted vehicle by adding a year, model, color, and VIN. You can also change the Unit ID and the amount. The vehicles **DO NOT** have to be the same transport amount.

**Insert**

ADD a vehicle to the order

**Change**

EDIT the highlighted vehicle

This browse box displays any trip information for the highlighted vehicle. If the vehicle has been assigned to 1 or more trips the information will show up here. When searching for a VIN you not only have the order but the trip information as well.

**Delete**

DELETE the highlighted vehicle

**OK**

SAVE the NEW Order or CHANGES to the existing Order

**Cancel**

ABORT the NEW Order or CHANGES to the existing Order

**Same As**

If the order you are entering contains multiple vehicles of the same model, enter the model for one of the vehicles. Highlight the vehicle directly UNDER the vehicle with the correct model and click on the SAME AS button. This will copy the Model and Make from the above vehicle.

= TAG (place a check mark to the left of the highlighted vehicle)

= UNTAG (remove the check mark to the left of the highlighted vehicle)

Allow detailed entry

When you are entering a pickup, drop or bill to customer that is in the customer Master Files, all the customer information (address, city, state, zone, etc.) is automatically entered into the order for you. These fields are disabled and you can not type information into them. If you need to change this information you can check the ALLOW DETAILED ENTRY box. This will enable all the fields for input and also unhide the APPLY buttons. If the customer changes you make to the order should be permanent, click on the APPLY button to update the Master File.

Charges

ATLinks will track charges towards a vehicle that are not included in the transport amount (i.e. storage, push-on, antifreeze check, etc.). To attach an additional charge to one or more of the vehicles on the order you must first TAG the vehicle(s). Click on the TAG button to tag the highlighted record and repeat for all vehicles that will be assessed the SAME charge. Next, click on the OTHER CHARGES button, the following window will appear.

Other Charges Entry Screen...

Date: 5/05/2003

 Cancel

*Date: The date of the note*

*Description: A short description of the note. This description will appear in the list of notes.*

*Comments: Up to 1000 characters of text.*

There is no limit to the number of individual notes that each vehicle can have.

| Unit ID | Year | Model       |
|---------|------|-------------|
| 1       | 1999 | S-10 Blazer |
| 2       | 2002 | S-10 Blazer |
| 3       | 2002 | S-10 Blazer |

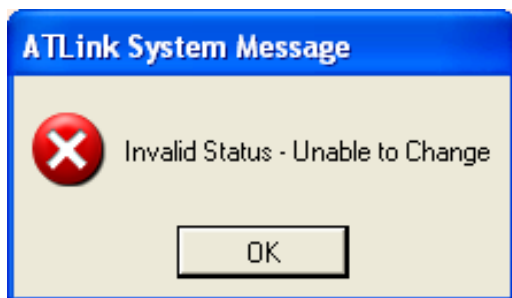

After returning to the List of Cars, any vehicle containing one or more notes will be preceded by the icon displayed in the illustration to the left.

Pressing the Status button allows you to assign two additional conditions to a vehicle. If the highlighted vehicles status is “Waiting” the status button will change the vehicle status to “On-Hold”. The On Hold status allows the vehicle to remain in the order but does not allow the dispatcher access to the vehicle while a trip is being built. If the highlighted vehicle status is “ON-Hold” the status button will change the vehicle status to “Cancelled”. This can be used to verify why a vehicle was not transported. Deleting the vehicle may cause confusion as to the correct history of the order. When the status of a vehicle is changed to cancelled, the amount columns are set to zero. If the status button is pressed again the vehicle will be restored to a “Waiting” status and the amounts will be restored. If you exit the Active Orders Update Form Screen before returning the status to “Waiting” the amounts will have to be reentered by the user. If the status button is pressed on a highlighted vehicle with a status other than those mentioned here, the following warning will appear.

Vehicles may contain a variety of status conditions, However only the three discussed above can be changed or assigned from the

list of cars in the Active Orders Entry Form Screen. Other statuses will be discussed later in this manual.

Staging

Pressing the staging button will bring up the staging entry browse screen. This is where previously staged cars can be imported into a new order. To learn more see section on staging.

Reset Unit

Pressing the reset unit button will remove the highlighted unit from all trips, and splits the vehicle has previously been assigned to, and return the vehicle status to waiting. A warning screen such as the one below will appear before ATLinks will reset any unit selected.

After an order has been entered into the ATLinks program we can schedule the vehicle(s) for a trip. A trip consists of ALL the vehicles that will be transported by a truck from the time it leaves the yard until it returns. All vehicles in the drivers trip packet should appear on the trip.

The first step in creating a trip is to select DISPATCH >TRIP SHEETS from the Main Menu OR click on the picture of the car hauler directly below the Main Menu. Either choice you make will open the Trip sheet Entry Browse Screen. The Trips that will appear in this list are referred to as active trips because they have not yet been completed. At the time these trips are completed they will no longer show up in this window. The following illustrations will describe the Trip sheet Entry Browse Screen in detail.

These buttons will allow you to choose which trips you view. Whether they are active, in the history, or both.

## Building a Trip...

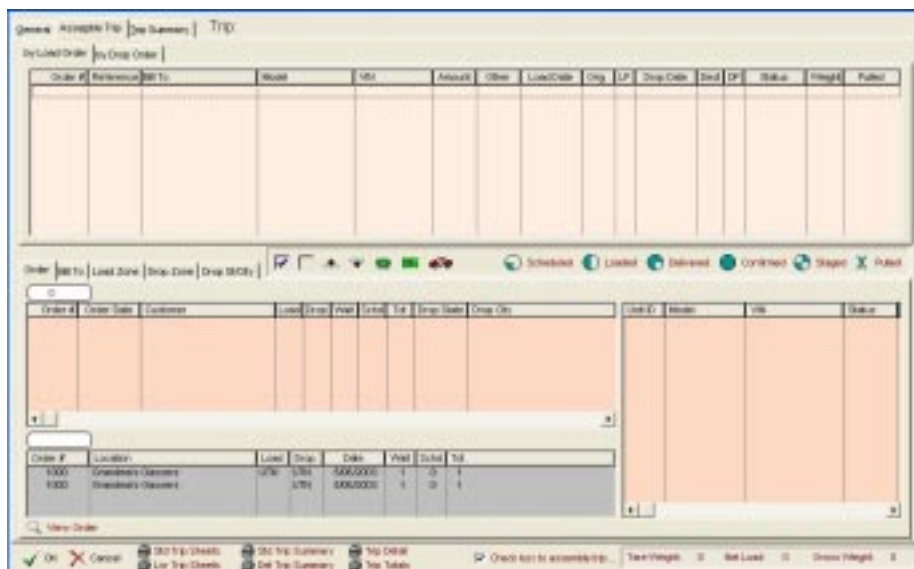

Click the INSERT button on the Trip sheet Entry Browse window. This will open the Trip sheet Update Screen.

Notice the tabs at the top of the window, the GENERAL tab is currently selected. All the fields except the start date will be empty. The cursor is now blinking in the field titled “Truck Number”.

The screenshot shows the 'Trip sheet Update Screen' with the 'GENERAL' tab selected. The window title is 'General | Assign to Trip Summary | Trip:'. The 'General Trip Information' section contains fields for 'Truck Number', 'Trip Number', and 'Description'. Below these are fields for 'Driver 1', 'Driver 2', and 'Truck Owner'. There are also fields for 'Rate', 'Mileage', 'Per Diem', 'Nightclub', and 'Liquor'. A 'Start Date' field is present. A note at the bottom of the section says 'This driver was previously not for a consecutive day, ending on'. Below the 'General Trip Information' section are three tables: 'Trip Expenses', 'State Fuel and Mileage', and 'Trip Totals'. The 'Trip Expenses' table has columns for 'Date', 'Description', 'Amount', 'Balance', and 'Expense'. The 'State Fuel and Mileage' table has columns for 'Date', 'Mileage', and 'Costs'. The 'Trip Totals' table has columns for 'Description' and 'Total'. At the bottom of the window is a status bar with buttons for 'OK', 'Cancel', 'Run Trip Sheet', 'Get Trip Summary', 'Get Trip Totals', 'Check for available trip...', 'Trip MILE', 'Trip Load', and 'Trip Weight'.

Type in the Truck Number and press the TAB key. If the truck number you type in is not in the Master File, the Truck Browse window will open. You can highlight one of the trucks on the list and press the SELECT button. If the truck you want is not in the Master File, you can enter it at this time. After a valid truck number is entered ATLinks will assign a Trip Number. You can change this number BUT you can not have a duplicate Truck/Trip number. ATLinks will also fill in several of the fields in the “General” section based on information in the Master Files. This information can be changed if need be. This window also contains 3 browse boxes. These browse boxes and the entry fields on the “General Tab” will be discussed later in this section.

Click on the ASSEMBLE TRIP tab. The window now contains 4 Browse Boxes. The browse at the top of the window will be a list of the vehicles transported this trip. The browse in the center left position is a list of all ACTIVE orders that have at least 1 waiting or scheduled vehicle. The browse on the bottom left is a list of Orders that have at least 1 split vehicle that has waiting or scheduled status. Splits will be discussed later. The browse on the bottom right is a list of vehicles on either the active orders or splits, depending on which browse is selected on the left side of the window. The related browses will both be the same color.

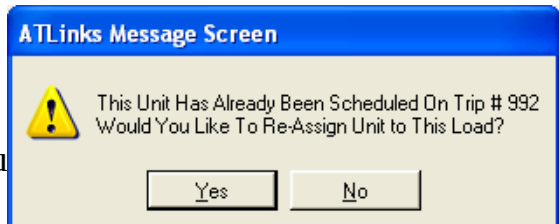

To schedule vehicles on a load, click on the active orders browse (center left) and highlight the order of your choice. The tabs at the top of the Orders browse will allow you to sort the orders in the same four choices discussed in the Creating an Order section of this manual. A list of vehicles with a waiting or scheduled status will appear in the vehicle browse (lower right).

If you want to schedule all of the vehicles from the highlighted order, place the mouse pointer over the highlighted order in the active order browse (center left). While HOLDING DOWN the left mouse button move the mouse pointer over the top of the trip browse (top) and release the left mouse button. This is referred to as DRAG and DROP (you drag the highlighted record to the top and drop it onto the trip). The vehicles will appear in the trip browse and the vehicles in the lower right will have a status of scheduled.

If you only want to schedule a single vehicle from the order DRAG and DROP the highlighted vehicle from the vehicle browse (lower right).

If you DRAG and DROP a vehicle with a status of scheduled from the vehicle browse to the trip browse, a message window will appear. The window will notify you that you are trying to place an already scheduled vehicle on the trip. It will alert you to the trip number the vehicle is currently scheduled on and ask if you want to reschedule the vehicle for the trip you are building. Click on YES to reschedule the vehicle or NO to leave the vehicle scheduled where it is.

Checking the assemble trip box enlarges the trip browse allowing the dispatcher to see more of the vehicles assigned to the trip.

To remove a scheduled vehicle from a trip, DRAG and DROP the vehicle from the trip browse onto either the active order browse OR the vehicle browse. If you drop the vehicle on the active order browse, ALL vehicles from the same order will be taken off of the trip. If you drop the vehicle on the vehicle browse, only that vehicle will be taken off of the trip. ONLY vehicles with a status of SCHEDULED can be removed from a trip.

This is a good time to SAVE the Trip by clicking on the OK button at the bottom left of the window. Saving the trip will close the Trip Update Form and return you to the Trip Browse Screen. To reopen the trip for additional changes, place the highlighter bar on the desired trip and click on the CHANGE button.

## Beyond Scheduled...

Press the Loaded button to change the vehicle status to LOADED. As soon as a vehicle becomes LOADED, it will disappear from the vehicle browse on the bottom right of the screen. This will also place the current date in the Load Date column of the Trip Browse and put a vehicle weight in the weight column. The weights of LOADED vehicles are totaled at the bottom of the screen for a net load and added to the truck tare weight for a gross load weight.. The Load Date can be changed by double clicking the mouse pointer over the desired Load Date. Type in the new Load Date or use the arrows to spin the date up or down the desired amount. When the correct date is in the column, you can press the up or down arrows on the keyboard. This will change all the dates you scroll past to the date you entered in. When you're finished press the enter key to save the changes.

Press the Delivered button to change the vehicle status to DELIVERED. This will place the current date in the Drop Date column of the Trip Browse. The Drop Date can be changed by double clicking the mouse pointer over the desired Drop Date. Type in the new Drop Date or use the arrows to spin the date up or down the desired amount. When the correct date is in the column, you can press the up or down arrows on the keyboard. This will change all the dates you scroll past to the date you entered in. When you're finished press the enter key to save the changes.

After the driver has returned the Trip Packet, all the vehicles on the trip can be confirmed. In order for the vehicle to receive a status of confirmed, it must contain a load and drop date. If these conditions are not met, ATLinks will give you a warning screen. Confirming the individual vehicles is required before invoicing our customer.

Scheduled

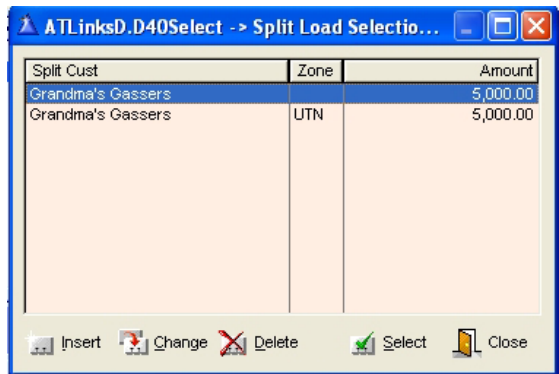

Pressing the Scheduled button will return the status of the vehicle to SCHEDULED and remove the load and drop dates. After the vehicle has a status of Scheduled it will again appear in the vehicle browse at the bottom right of the window as long as the related order to the left is highlighted.

## The Split Load...

Using multiple trucks to  
deLiver a vehicle...

Sometimes it is necessary to use more than one truck to deliver a vehicle. Local pickup and delivery are good examples of splitting a load. A local truck may bring the vehicle to the yard, the vehicle is then hauled to another yard close to the final destination and another local truck delivers the vehicle to its final destination.. Whatever the case may be, ATLinks is designed to handle split loads easily and efficiently.

To split a vehicle off of a load the vehicle must be in a LOADED status. DRAG the LOADED vehicle from the Trip Browse at the top of the window and DROP it onto the

Vehicle Browse at the bottom right of the window. After you do this the Split Load Selection Screen will appear. This window will contain a list of splits that are associated with this trip. If no splits are listed, press the Insert button. The Split Load Master screen is now open Enter the

Enter the amount charged for this trip: 2.00

DropOff: [Location Icon] Date: 06/12/2008 Zone: [Zone] Apply

Address: [Address] City: [City] State: [State] Zip: [Zip]

Contact: [Contact] Phone: 080-8008 Mobile: 008-8008

OK Cancel Allow detailed entry

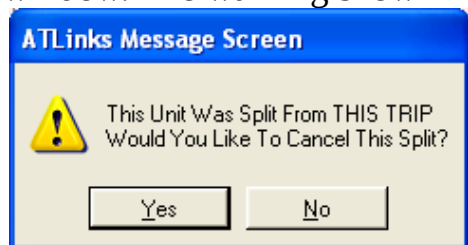

amount charged for this completed leg of the split and type in the location where the vehicle is being dropped off. Press the OK button to

save the split information and then press the SELECT button on the Split Load Selection Screen to return to the Assemble Trip Screen. The status of the vehicle is now

SPLIT and the order containing the Vehicle(s) will be visible in the bottom left of the window in the Split Browse. To schedule a split vehicle, highlight the order in the Split Browse and DRAG and DROP the vehicle from the bottom right hand side of the window to the Trip Browse at the top. Split vehicles must be scheduled individually. When a split vehicle is scheduled on a trip, the amount is reduced by the combined amount of any previous splits.

### Canceling a split...

To cancel a split you must return the vehicle to the trip that it was on previous to the split. Highlight the order containing the split vehicle in the split browse at the bottom left of the window. DRAG the desired vehicle from the vehicle browse at the bottom right and DROP it onto the Trip Browse at the top of the window. The warning shown to the right will appear. Press YES to cancel the split or NO to leave things the way they are.

### More about the trip...

You can enter preprinted BOL numbers directly into the trip browse by double clicking on any one of the vehicles from the order that the BOL represents. Type the BOL number into the REFERENCE column of the browse and press the enter key to save it. Remember you only have to enter the number into ONE vehicle from the order. When ATLinks creates the invoice it will place this number in the invoice as a reference. Invoices can be located using this reference number.

## Watching your weight...

|   | Status | Weight | Pulled |
|---|--------|--------|--------|
| 1 | Loaded | 2,400  |        |
| 2 | Loaded | 3,150  |        |
| 3 | Loaded | 2,700  |        |
|   |        |        |        |

If the weight of the vehicle is contained in the Make/Model file it should appear in the trip

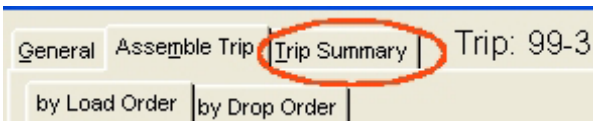

browse. If you want to add or change the weight, double click

in the weight column on the desired vehicle, enter the weight and then press the enter key to save the weight. The weights of all vehicles with a LOADED status are tallied at the bottom of the window. If the truck being used for this trip has a light weight entered in the master file it will also be used in the calculations. This will give the dispatcher a guideline for building the trip.

Tare Weight: 95,955   Net Load: 4,194   Gross Weight: 100,149

The second of the hidden columns is the Pulled column. Pressing the PULLED button places an “X” in this column so the dispatcher can tell if the car has been pulled from the auction lot.

The Trip Summary tab will allow you to see a summary list of the entire trip. A separate line will be displayed for all the cars from each order on the trip. If the order contains vehicles that are different prices, a line will be displayed for each price within the order.

| Noted As  | Area | Type           | Damage | Severity |   |                                |
|-----------|------|----------------|--------|----------|---|--------------------------------|
| Exception | 11   | DOOR LEFT REAR | 01     | BENT     | 4 | OVER 12 INCHES IN LENGTH/DIAME |

This is where you will be able to locate/enter any damages associated with this trip. Click on the insert button. This will bring up the damage update screen.

Area:  DOOR LEFT REAR

Type:  BENT

Severity:  OVER 12 INCHES IN LENGTH/DIAME

Noted As  
☒ Exception ☐ Inspection

Comments

OK Cancel ☐ Check if exception is disputed

Entry of the damage detail is based on Standard Industry Damage Codes. You may use these, or ATLinks will allow you to provide your own codes.

Noted As  
☒ Exception ☐ Inspection

Below the damage fields are two buttons labeled Exception or

Inspection. An Exception is any damage noted that occurred on the trip. An inspection if you choose to note it is any damage that occurred prior to the vehicle being loaded. Click the OK button to save this damage claim. The damage exceptions that are entered in to this part of the program can later be tied to a future damage claim received from a customer. Damage claims will be discussed later on.

This button will allow the user to view the highlighted order

Clicking this button will print a separate Trip Sheet for every group of vehicles on the Trip Browse that share the same Order Number. (see Appendix A, Figure 3 for report example)

The Lsr trip sheet button will print the leasor's percentages, or amounts, on the trip sheet and place your company as the bill to.

The Print Trip Detail button will create a report of ALL vehicles assigned to the trip grouped by Order Number.

This report will print out all of the totals that are pertinent to this trip. (see Appendix A, Figure 2 for Trip Totals Example)

# The General Tab Revisited...

If the truck for this trip is contracted, who will receive the percentage of additional vehicle charges.

Now let's take a detailed look at the entry fields found on the General Tab.

*Truck Number: Truck Number for this trip.*

*Trip Number: A unique number generally assigned by the ATLink System.*

*Driver 1: Single or Lead driver for the trip.*

*Rate: Driver's wage percentage.*

*Reserve: Percentage withheld for damage reserve.*

*Per Diem: Driver 1 Daily Per Diem*

*Start Date: Date trip began*

*End Date: Date trip ends*

*Beg Odometer: Beginning odometer reading*

*Ending Odometer: Ending odometer reading*

*Lease Rate: If truck is contracted enter the percentage to be paid*

*Payroll Back Charge: If you pay the driver of a contracted truck, enter the amount to back charge the owner.*

*Driver 2 field definitions are the same as driver 1.*

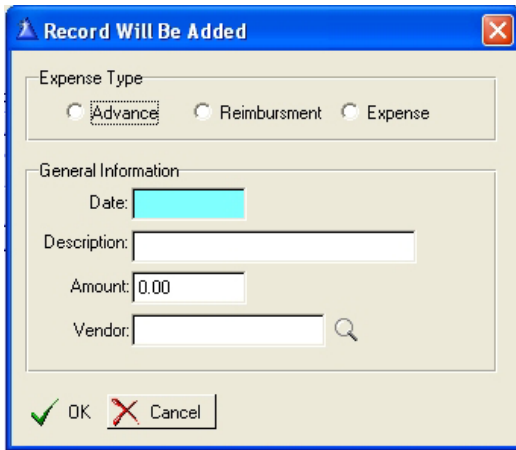

*Enter information for second driver only when applicable.*

## More Browsers...

The General section of the trip contains three browse boxes or list boxes if you will.

### Trip Expenses...

ATLinks can track all the Advances, Reimbursements and Expenses associated with a trip. Click on the Insert button to add a new expense or the Change button to edit an existing expense. Enter the Type of Expense, Date, Description, Amount and Vendor (if applicable) .

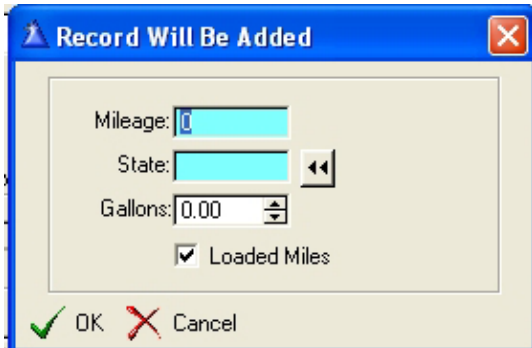

The dialog box titled "Record Will Be Added" has a blue header bar with a close button (X). It contains three radio buttons under "Expense Type": "Advance" (selected), "Reimbursement", and "Expense". Below is a "General Information" section with fields for "Date:" (light blue), "Description:" (white), "Amount:" (0.00), and "Vendor:" (white with a magnifying glass icon). At the bottom are "OK" (with a green checkmark) and "Cancel" (with a red X) buttons.

 **OK** SAVE the new expense or changes to existing expense.

 **Cancel** DO NOT SAVE the new expense or changes to existing expense.

### Trip Fuel and Mileage...

ATLinks can also track your state fuel and mileage. Click on the Insert button to add fuel/mileage or the Change button to edit existing fuel/mileage Enter the Mileage traveled in the state, the state code, the gallons of fuel purchased in the state, and check the box if the truck was loaded.

The dialog box titled "Record Will Be Added" has a blue header bar with a close button (X). It contains fields for "Mileage:" (light blue), "State:" (light blue with a dropdown arrow), and "Gallons:" (0.00 with a spinner). Below these is a checkbox labeled "Loaded Miles" which is checked. At the bottom are "OK" (with a green checkmark) and "Cancel" (with a red X) buttons.

(if truck was loaded for only a partial of the state miles, make 2 entries). This information can be used to print quarterly reports that can help with state fuel tax forms.

## Trip Totals...

| Trip Totals |          |
|-------------|----------|
| Description | Total    |
| Orders      | 1.00     |
| Revenue     | 5,040.00 |
| Driver      | 1,108.80 |

The Trip Totals Browse will display a continuous list of totals for the trip, including Number of Orders affected, Trip Revenue, Driver Pay, Mileage, Days. etc. This list will update automatically as the trip progresses. It makes it possible to get a good trip overview at a quick glance.

## Confirming the Trip and Creating Invoices...

Once the trip is complete and the information for each vehicle has been verified, the trip can be confirmed. Click on the OK button to save all changes and return to the Trip Sheet Entry Browse window. Hold down on the ALT key and tap the F9 key to make the Confirm Trip button appear.

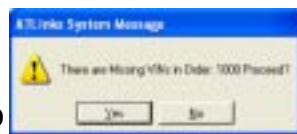

While the desired trip is highlighted, click on the  Confirm Trip

Confirm Trip button. If you click on the button before all cars contain a status of “Confirmed”, “Split” or “Staged” or if one or more vehicles is missing a VIN, a warning

“Confirmed”, one or more VIN, a warning

screen will alert you that a problem exists. Correct the problem and Click the Confirm Trip button. When the trip is confirmed, an open invoice is created for vehicles from each order on the trip. Only vehicles with a “Confirmed” or “Staged” status will be invoiced.

Vehicles with a “Split” status will not be included on an invoice at this time. Split vehicles will invoice when the trip that delivered them to their final destination is confirmed. This insures that the customer will only be billed once for each vehicle on the order. After the invoices are created the Active Trip is logged into history. All orders with vehicles on this trip will be checked. If all the vehicles on the order show “Confirmed”, the Active Order will be logged into history. At this time you will be returned to the Trip Sheet Entry Browse Screen. The trip that was confirmed WILL NOT appear in the list at this time.

# Open Invoices...

From the Main Menu select INVOICES or press the button with the picture of the open folder. Either of these options will open the Invoice Browse Screen. The top of this window contains a list of all open invoices. All vehicles pertaining to the highlighted invoice will be displayed in the list at the bottom of the window. Pressing the tabs at the top of the window allows the list of open invoices to be sorted by Invoice Number, Reference Number, or Customer Name respectively.

Holding the alt key and pressing the F10 key will bring up the option to change or delete an invoice

Delete Invoice

Clicking on the Delete button will delete the highlighted invoice.

Change

Clicking the change button will allow you to alter the highlighted invoice

# Printing Invoices...

## Tagging invoices to print...

 The Tag button is used to mark selected open invoices to print. Clicking on the Tag button places a blue check mark to the left of the highlighted invoice. After tagging all desired invoices, click on the Print Invoices button. All tagged invoices will be printed.

 **Invoices** Printed invoices are formatted to fit into a standard #10 window envelope. Invoices that have been printed display a dark red color in the open invoice browse screen. Invoices can be printed as many times as needed. ( See Appendix A, Figure 4 for example of an invoice printout)

 Click on the UnTag button to deselect the highlighted invoice.

 **List** Click on the Print Invoice List to print a list of all invoices by date range.

## Applied payments/ credit memos ...

| Payments                                                                                               |      |        |
|--------------------------------------------------------------------------------------------------------|------|--------|
| Check #                                                                                                | Date | Amount |
|                                                                                                        |      |        |
|                                                                                                        |      |        |
| Credit Memos                                                                                           |      |        |
| C/M #                                                                                                  | Date | Amount |
|                                                                                                        |      |        |
|                                                                                                        |      |        |
|  Delete Credit Memo |      |        |

Next to the list of invoices is a list of the payments/credit memos that have been applied to the highlighted invoices.

 Delete Credit Memo

This button will allow you to delete any credit memos that have been applied to an invoice

## Applying payments to an invoice...

To apply a payment to an invoice or invoices, select **PAYMENTS>APPLY PAYMENTS** from the Main Menu OR click on the button with the picture of a dollar sign. This opens the Payment Entry Screen. This screen allows a payment to be applied to one or more open invoices. Type in the customer name and press the Tab Key. All open invoices pertaining to the customer will be displayed in the browse box at the bottom of the window. Remember you must tab off the customer field or select another field by clicking on it with the mouse before the open invoices will appear in the list. An empty list means that this customer has no outstanding invoices.

| Invoice # | Reference | Date      | Total    | Balance  | Applied |
|-----------|-----------|-----------|----------|----------|---------|
| 3300005   |           | 8/26/2003 | 0.043 00 | 0.043 00 | 0.00    |

Buttons: Post Payments, Cancel

If the customer has an unapplied payment, a screen will be displayed offering a choice of applying or ignoring the unused payment. If the **APPLY** button is clicked, ATLlinks fills in the date, check#, amount and

ATLlinks System Message

⚠ This customer has payment(s) that have not yet been applied to an invoice.

Buttons: Apply, Ignore

balance fields with the information from the outstanding check. If **IGNORE** is clicked OR if there is no unapplied payment to consider, fill in the Date, Check#, and Amount fields with the current payment information. The Balance field will be filled in by ATLlinks and the description field is optional.

After all the check information has been entered, place the mouse pointer in the applied column on the desired invoice and double

| total | Balance   | Applied |
|-------|-----------|---------|
| 00    | 22,220.00 | 20000   |
|       |           |         |

click. The applied field will default to the amount of the invoice balance or the remaining amount of the payment. You can override the applied amount if necessary. Repeat this procedure for all applicable invoices. After the payment has been applied to all desired invoices, press the enter key. This completes the column editing. Do not proceed until the column editing has been completed by pressing the enter key. Doing so may cause payment information to be incorrect.

Click on the Post Payments button to **SAVE** the payment and **UPDATE** the invoice(s) with the payment information.

Click on the Cancel button to **EXIT** the Apply Payments Screen **WITHOUT SAVING** any of the payment information.

## Open Payments...

Select PAYMENTS > VIEW PAYMENTS from the Main Menu to open the Payment Screen. This window contains a list of Active Payments (payments that still have an unapplied balance) and a list of invoices that a portion of the highlighted payment has been posted to. Also you may click the history button to view all payments in the history.

☒ Active ☐ History ☐ All

| Customer       | Date      | Check # | Description | Amount    | Balance   |
|----------------|-----------|---------|-------------|-----------|-----------|
| Austin Bombers | 5/12/2003 | 48      |             | 25,200.00 | 25,200.00 |
| Austin Bombers | 5/12/2003 | 48      |             | 500.00    | 500.00    |
| Austin Bombers | 5/12/2003 | 552865  |             | 5,400.00  | 5,400.00  |

**Invoices**

| Invoice # | Amount |
|-----------|--------|
|-----------|--------|

Pre-Payment: Delete

Pre-Payment

ATLinks allows for entry of Prepayments. These are payments that are entered without being applied to an existing open invoice. Clicking on the Pre-Payment button opens the Pre-Payment Entry Screen. Enter the payment information to be applied to future invoices.

Delete

Customer:

Date:

Check Number:

Description:

Amount:

OK Cancel

Clicking Delete will delete the Highlighted payment and update any affected invoices as if the payment had never been posted. Any invoice with a

balance of 0 will be reopened and will display in the Open Invoice Browse Screen and on all applicable reports.

# Creating a Credit Memo...

Credit can be applied to a customer by creating a Credit Memo. To create a Credit Memo return to the Open Invoice Browse Screen by selecting INVOICES > OPEN INVOICES from the Main Menu or clicking on the picture of the Open File Folder.

Click on the Create Credit Memo button to open the Credit Memo Form Screen.

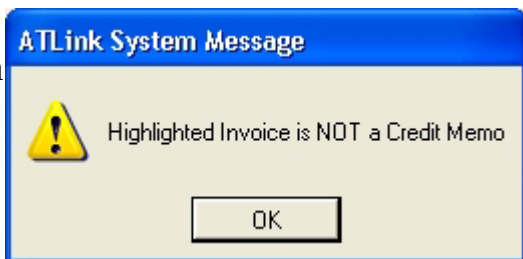

A screenshot of a software window titled "ATLinksD.CreditMemoFE -> Creating a Cred...". The window has a blue title bar with a close button (X) on the right. The main area is a light beige form with four input fields: "Date:" with a text box containing "5/14/2003", "Customer:" with an empty text box, "Description:" with an empty text box, and "Total:" with a text box containing "0.00". At the bottom of the form are two buttons: "OK" with a green checkmark icon and "Cancel" with a red X icon.

Enter the appropriate information into each field on the Credit Memo Form. The amount should be entered as a positive number. ATLinks will change it to a negative credit amount automatically. The description will appear on the printed credit memo and the reference will read CREDIT MEMO.

To apply a credit memo to open invoices, highlight the credit memo you wish to apply towards a customers open invoices and click on the Apply Credit button.

If the highlighted record is not a credit memo a warning screen will be displayed. The Apply Credit Screen is identical to the Apply Payments Screen except the Customer, Date, Amount, and Balance fields are prefilled with the information from the credit memo and the browse list will already contain all of the customers open invoices. An empty list means there are no open invoices to apply the credit to. Credit is applied in the same manner as payments. (Refer to the previous section on Applying Payments to an Invoice...)

|-----------|-----------|-----------|-----------|-----------|---------|
| 0300002   |           | 5/08/2003 | 22,220.00 | 22,220.00 | 0.00    |

☒ Post Credit
 ☒ Cancel

Credit memos are negative invoices. Therefore all reports that pertain to the invoices also pertain to the credit memos. To print a credit memo, follow the instructions for printing invoices. The invoice list report will offer you the option of printing Invoices, Credit Memos, or both. Credit memos can be deleted from the Open Invoice Browse Screen.

# Damage Claims...

Click the Damage Claims option on the main menu. This is the place you will go to find damage exceptions as your customers send in damage claims.

As with other screens in ATLinks you will have the option of viewing the information whichever order you choose by selecting the appropriate tab. This screen also has the option of viewing only the history, only the active, or both.

Click on the insert button to search for a noted exception. Upon entering the VIN ATLinks will automatically bring up any exception that has been noted on a trip that matches that VIN number. Along with all its information. If the no information appears after entering the VIN and hitting the tab key, this means that there has been no exception noted on this vehicle.

The following are the entry fields for a damage claim..

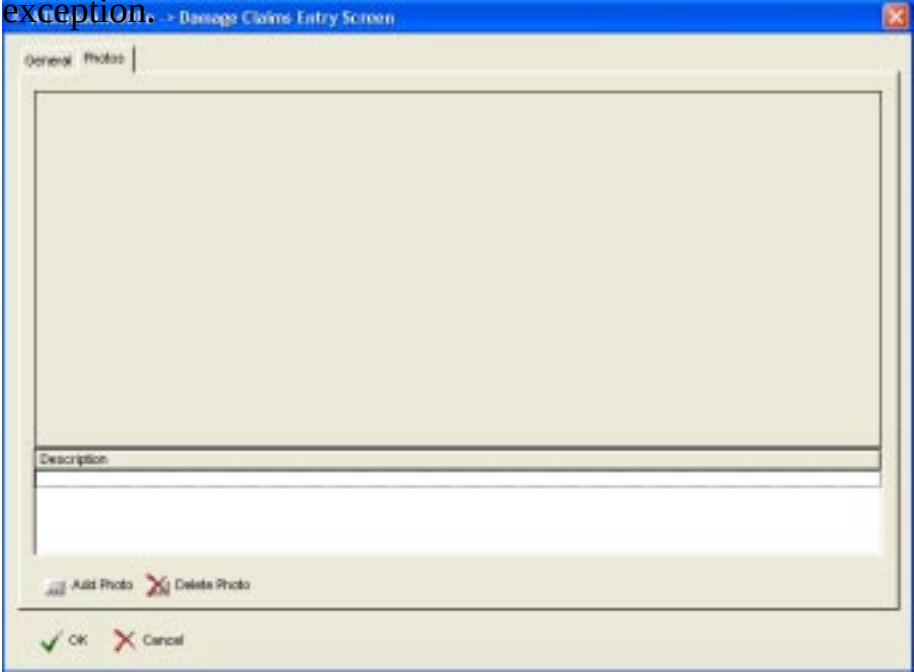

*VIN: Vehicle Identification Number*  
*Customer: Customer Name*  
*Claim Date: Date the claim was made*  
*Payee: Who gets the money*  
*Notification Date: Date you were notified of the claim*  
*Claim Number: Claim Identification Number*  
*Estimated: Estimated Cost*  
*Paid: Amount Paid by your Company*  
*Accounting Date:*  
*Driver: Driver assigned to Truck*  
*Comments: Other information*

Click one of the following buttons to choose the status of the damage claim. An open status is automatically selected. You may select Paid, Settled, or Denied.

☒ Open ☐ Paid ☐ Settled ☐ Denied

This Damage claim will be removed from the open browse until an accounting date is entered in, then it will be placed in the history.

Click on the photo tab. Here you will be able to add, view or delete any pictures that have been provided concerning the exception.

To enter in a new photo into the photo screen click the Add Photo button. A browse screen will be brought up allowing you to search for the picture you would like to submit. You may enter as many pictures regarding this damage claim as you would like

If you want to delete a picture simply highlight it and click the delete button

Pressing the OK button will save the new, or changed damage claim information

Pressing cancel will leave the screen without saving any changes

# Average Trip Time By Date Range...

Atlinks has the capability of calculating the average trip time by any date range that you choose to enter in. Click on Utilities>Average Transport Days from the main menu bar this will bring up the average trip by date range screen

Average Trip Time by Date Range...

Beginning Date: 5/02/2003

Ending Date: 5/10/2003

|                     |    |                            |          |
|---------------------|----|----------------------------|----------|
| Units Transported:  | 17 | Average Days to Transport: | 0.06     |
| Units in Transit:   | 2  | Average Revenue per Unit:  | 1,342.06 |
| Errors Encountered: | 0  |                            |          |

 Process

 Close

Here you will have the option to process any length of time, simply enter in the date range you desire and push the process button

 Process

ATLinks will then calculate the number of units transported, the average days to transport, units in transit, and the average revenue per unit that fall within that date range. Also in the bottom left of the screen you will notice an error calculation. Don't worry, this is ATLinks way of telling you that within this date range a unit had a drop date entered in that was previous to its load date. So ATLinks had no way to determine the number of transport days.

 Close

Click the close button to exit this screen

## Searching for VINs...

ATLinks offers two separate ways of finding a vehicle with a VIN. If you know the entire VIN as it was entered into the ATLink System, you can open the Active Orders Entry Browse window and type the VIN into the VIN search field at the top right of the window. After the VIN is typed in press the “Search for VIN” button and ATLinks will open the latest order that the vehicle is found in. If the vehicle is found in more than one order, each order will be presented in turn until all orders have been viewed.

The second method of tracking VINs is used if you only know a portion of the VIN that you are looking for.. The partial VIN must be the last portion or right most characters of the VIN. To search by partial VIN Select UTILITIES > PARTIAL VIN SEARCH from the Main Menu OR click on the button with the picture of the magnifying glass. This will open the Partial VIN Search Browse.

Processing Record 18 of 18

by Trip | by Order | by VIN | by Invoice # | by Reference | Enter Partial VIN for Search: 5

Enter Partial VIN for Search

Enter the partial VIN in the field at the top right of the window. You may enter from 1 to 17 characters. Keep in mind that each additional character entered reduces the possible results.

Begin  
Search

Now click on the Begin Search button at the bottom left of the window. Each vehicle that matches the characters entered will appear in the list. This list can be sorted by Trip#, Order#, VIN, Invoice#, and Reference# by clicking on the respective tab at the top of the list.

Cancel  
Search

Clicking the cancel search button allows you to cancel the searching process. One application of this may be if ATLinks has already listed the number you need and is still searching for other cars with that same partial VIN.

View  
Trip

Click on the View Trip button to view the trip listed in the Trip# column of the highlighted vehicle.

View  
Order

Click on the View Order button to view the order listed in the Order# column of the highlighted vehicle.

# Staging...

Lets say that a bank places an order to transport repo cars from an area but has not decided on their final destination. The car is picked up and delivered to a staging lot. The vehicle status is set to STAGED and the trip is confirmed. This will invoice the customer for bringing the unit to the staging lot and will also leave the vehicle information in the ATLinks program so that when the customer places the order to move the vehicle to its final destination, the dispatcher does not have to re-enter all make model and VIN information. From the list of cars tab in the order entry screen, click on staging and tagged the staged vehicles to move into the new order.

Staged

ATLinkSP227a - Staging Entry Screen

Date: Location: 104

| Date    | Location            | VIN       | Year | Make      | Model       | Color |
|---------|---------------------|-----------|------|-----------|-------------|-------|
| 5/14/00 | Grandview-Garyville | 150410101 | 2000 | Chevrolet | 5-10 Chevro |       |
| 5/14/00 | Grandview-Garyville | 150410101 | 2000 | Chevrolet | 5-10 Chevro |       |

Tag UnTag Close

Staging

If you press the staging button while creating a new order you will have the option of flagging the desired cars and pressing the close button to add these tagged cars to the new order.

Click this button to flag whichever car you would like to add to the new order.

Click this button to unflag any cars you've flagged.

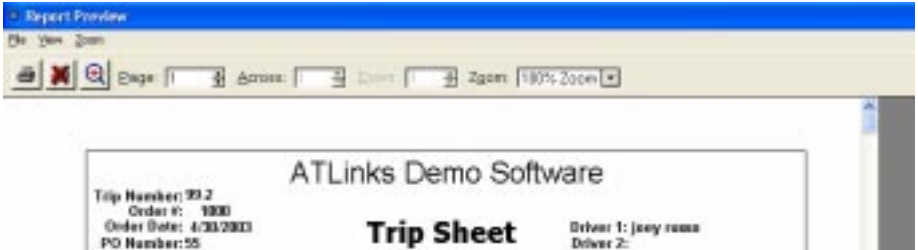

Close

Press the Close button to add the cars that have been flagged with a blue check mark to your new

## Reports...

ATLinks offers a wide variety of reports. The following is a list of reports that are found in the report section of the Main Menu along with a description of each. Some reports are preceded with a window that allows the user to specify how the report should be configured (date ranges, various check boxes, etc.). All reports are first displayed on the screen for preview.

Press the Print Button on the preview window to print the report.

Press the Cancel Button on the preview window to exit the preview without printing the report

## General

### Customers

Customer List - A detailed list of all customers in the Customer Master File.

### Drivers

Driver Summary List - General information about all drivers in the Driver Master File.

Driver Detail List - A detailed list of all drivers in the Driver Master File.

## Trucks

Truck Summary List - General information about all trucks in the Truck Master File.

Truck Detail List - Detailed information about all trucks in the Truck Master File.

**Zone Master List** - A listing of all zones and descriptions in the Zone Master File

**Zone Pricing List** - A listing of all zone default pricing in the Zone Pricing Master File

**Make/Model List** - A complete list of all Make/Models in the Master File.

## Accounts Receivable

Active Orders List - A listing of all active orders in the system.

Order Revenue by Date Range - A list of all orders within a date range with revenue totals.

Statements - A printed statement of all open invoices previous to an ending date.

Payments by Date Range - All payments within a date range.

Aging Report - A listing of all open invoices with aging columns.(See Appendix A, Figure 5)

## Accounts Payable

Driver Wages by Date Range - A listing of drivers settlement for confirmed trips within a

date range.( see Appendix A, Figure 6)  
Leasor Truck Earning Report - A listing of leasor  
earnings within a date range
